

Conflict of interest statement

The authors would like to declare that the manuscript "Patterns of antihypertensive drug utilization in Serbia and adherence to treatment guidelines" being submitted to your journal fulfills the technical requirements, and also that the paper on the whole and/or partly has not been submitted nor accepted for publication elsewhere, nor is being simultaneously considered for publication elsewhere.

All authors have participated sufficiently in the work. Sabo A, Horvat O and Tomić Z participated in study conception and design, directed its implementation, including quality assurance and control and performed critical revision of the manuscript. Ban M was in charge of acquisition and conducted the literature review. Tomas A, Vukmirović S and Milijašević B were in charge of analysis and interpretation of data and drafting of manuscript.

The authors whose names are listed below certify that they have no competing conflict of interest.

This statement is signed by all the authors to indicate agreement that the above information is true and correct.
